

www.nospartsfromthepast.com Chevrolet Truck Parts List

Please read this document before proceeding to the parts list!

Thank you for your interest in my Chevrolet truck parts. I hope that you can find some items that will assist you in your restoration or repair of your Chevy.

This list contains parts that were specific to Chevrolet trucks. There are a great many mechanical, electrical and other parts that fit both Chevrolet cars and trucks. Due to the relative popularity of Chevy cars, we listed those parts under our Chevy car parts list. If you are looking for mechanical or electrical parts for your truck, I highly recommend that you check out the Chevy car parts list on this website.

Parts were input to our database by the truck model name used at the time, such as Commercial or Series 10. Unfortunately, we weren't completely consistent in using this strategy throughout the time that we entered parts into our database.

You may wish to use the "Search" or "Find" feature within the Acrobat Reader, but by doing so, you may miss some items that apply to your vehicle. The most consistent way to search is by looking at every listing and checking the model years for the item. You may wish to print the document, but be aware that it is 85 pages long!

General Motors service parts usage frequently crossed divisional lines. You may note in the comments for many parts that they also fit Pontiac, Olds, etc. Also, my father was a big fan of Pontiacs. If I identified a part that fit multiple makes, he would almost always have me list it as Pontiac. If you know the part number you need or are in extreme need of a part that might interchange, I would highly recommend searching the lists for other makes to see if it is listed there.

I have used my library of over 1000 General Motors parts catalogs to identify the parts listed. Some of the listings are complex and may require you contacting me with more information, such as ID numbers or frame breakpoints. If you are uncertain about anything, please contact me.

You will note that there are no prices listed for the parts. My father had not input prices while he managed the database for many years. Trying to research and input prices for all of the parts would be a large task. It will be considerably easier for me to price items as customers request. Whether you are interested in one or many parts, contact me through the "[Contact](#)" page on the website and I will reply to you with prices and availability.

The majority of my inventory is stored in a 1200 square foot warehouse. My father did a lot to identify and protect the parts he purchased, but he did not have a true inventory system. Larger parts were stored on shelves by similar make, while smaller parts were stored in file boxes and separated by group number and make. All of this is to say: I know that I have 99.9% of the parts listed; it just takes me a while to find them! Please exercise some patience with me while I check availability and condition of the parts you may be interested in.

Speaking of condition of parts, please consider this; **NOS does not mean perfect**. This is not a cop-out, but a fact. General Motors did not produce parts for show cars, but ones to be driven and used. I will inspect all parts for flaws upon access from storage and inform you if there are any concerns. Please note that any concerns we have already noted are listed in the comments section for that part.

I look forward to helping you with your part needs.
