

www.nospartsfromthepast.com Chevrolet Parts List

Please read this document before proceeding to the parts list!

Thank you for your interest in my Chevrolet parts. I hope that you can find some items that will assist you in your restoration or repair of your Chevy.

Parts were input to our database by model name, such as Corvette or Chevelle. Using Adobe Reader gives you the ability to search the document using keywords, such as the part number, group number or model name. Just type the keyword into the "find" box on the Adobe toolbar, then hit enter. To scroll through the list of matching items, click on the icons for "find next" and "find previous" next to the find box. You may wish to print the document, but be aware that it is 186 pages long!

One thing that Chevrolet did in their parts catalogs was to consolidate their full-size car nameplates under the title of "Passenger" or "Pass". When searching for a car from 1929-59 and a full-size car from 1960-75, it will have likely be listed as "Pass". If it fits a specific model, such as Impala, that will be noted in the comments section. Of course, for the small amount of time that it takes, you may be well off to search by the specific model name as well.

I am in the process of doing a detailed edit of the lists. Originally, I would write out the application for a part and my father would input it into the database. Unfortunately, I found that he input it quite literally from my pages. For example, I might ID a part as fitting 1962-64 Chevy II and 1965-67 Chevelle. He would input it as fitting 1962-67 Chevy II and Chevelle! Please use some common sense and take the model names and years with a small grain of salt. If you have any questions at all, please email me.

General Motors service parts usage frequently crossed divisional lines. You may note in the comments for many parts that they also fit Pontiac, Olds, etc. Also, my father was a big fan of Pontiacs. If I identified a part that fit multiple makes, he would almost always have me list it as Pontiac. If you know the part number you need or are in extreme need of a part that might interchange, I would highly recommend searching the lists for other makes to see if it is listed there.

I have used my library of over 1000 General Motors parts catalogs to identify the parts listed. Some of the listings are complex and may require you contacting me with more information, such as ID numbers or frame breakpoints. If you are uncertain about anything, please contact me.

You will note that there are no prices listed for the parts. My father had not input prices while he managed the database for many years. Trying to research and input prices for all of the parts would be a large task. It will be considerably easier for me to price items as customers request. Whether you are interested in one or many parts, contact me through the ["Contact"](#) page on the website and I will reply to you with prices and availability.

The majority of my inventory is stored in a 1200 square foot warehouse. My father did a lot to identify and protect the parts he purchased, but he did not have a true inventory system. Larger parts were stored on shelves by similar make, while smaller parts were stored in file boxes and separated by group number and make. All of this is to say: I know that I have 99.9% of the parts listed; it just takes me a while to find them! Please exercise some patience with me while I check availability and condition of the parts you may be interested in.

Speaking of condition of parts, please consider this; **NOS does not mean perfect**. This is not a cop-out, but a fact. General Motors did not produce parts for show cars, but ones to be driven and used. I will inspect all parts for flaws upon access from storage and inform you if there are any concerns. Please note that any concerns we have already noted are listed in the comments section for that part.

I look forward to helping you with your part needs.

Winter Lane
